## **DETAILED ACTION**

### ***Specification***

1. The amendment filed 9/27/04 in response to office action dated 5/19/04 is nonresponsive because it does not address the non final rejections that were cited. Consequently, the amendment has not been entered. Other discrepancies regarding the amendment are:

**2. In the Specification:**

The amended specification does not underline the changes that were made to the original specification so that they may be readily identified.

**3. In the Claims:**

Two sets of claims were submitted namely, the original and the amended claims 1-10.

A proper response is as follows:

- Delete the original claims 1-5.
- Number the new claims 6-10.
- Underline the changes that are included in the new claims, so that those changes can be readily identified.

4. The amendment is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows:

- Page 16, lines 12 and 13, "inverted L-shaped projections".
- Page 16, line 15, "105.30 degree".

- Fig. 1-Sectional side view; and Bottom view.

The specification does not include a statement that new matter has been added.

### ***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 1-5 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. On page 16 reference is made to inverted L-shaped projections; and the angle of each tooth being between 102 degrees and 105.3 degrees; and both views reflected in Fig. 1.

### ***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3723

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
